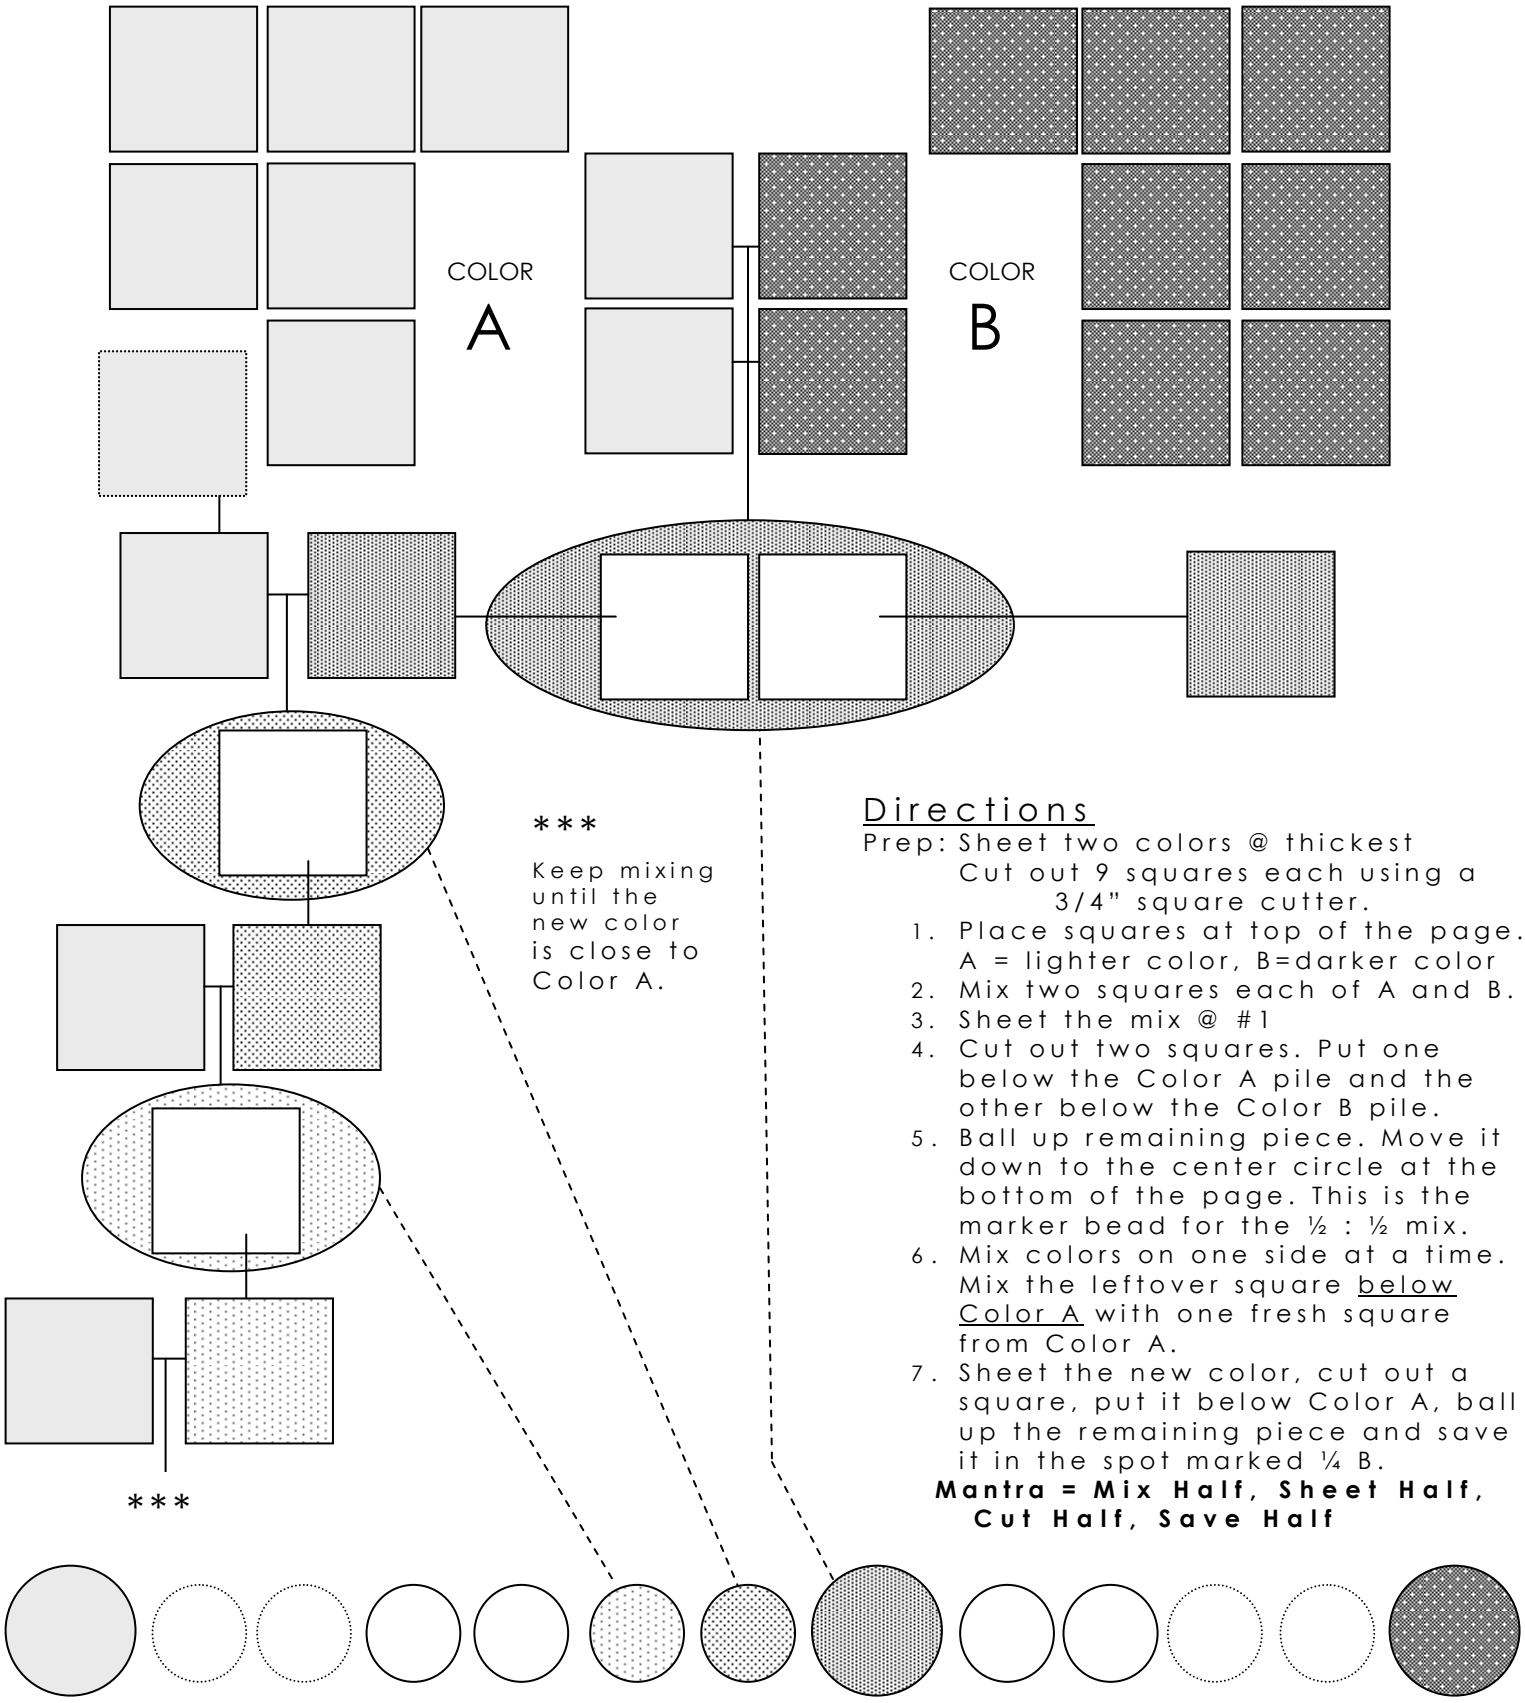
COLOR SCALES for POLYMER CLAY

© MAGGIE MAGGIO 2006



Directions

Prep: Sheet two colors @ thickest
Cut out 9 squares each using a 3/4" square cutter.

1. Place squares at top of the page. A = lighter color, B=darker color
2. Mix two squares each of A and B.
3. Sheet the mix @ #1
4. Cut out two squares. Put one below the Color A pile and the other below the Color B pile.
5. Ball up remaining piece. Move it down to the center circle at the bottom of the page. This is the marker bead for the ½ : ½ mix.
6. Mix colors on one side at a time. Mix the leftover square <u>below Color A</u> with one fresh square from Color A.
7. Sheet the new color, cut out a square, put it below Color A, ball up the remaining piece and save it in the spot marked ¼ B.

Mantra = Mix Half, Sheet Half, Cut Half, Save Half
